

**North American
Herb & Spice**

The *original* makers of wild high mountain oil of oregano, Oregamax, Juice of Oregano, and other edible herbs

Oregacyn P-73

North American Herb & Spice introduces the world to Oregacyn P-73, a proprietary formula of concentrated, edible spice extracts proven effective as a natural alternative to synthetic drugs. P-73 refers to the oil of a unique blend of edible, mountain-grown oregano, which, according to *Business Week* magazine, “could turn into the next wonder drug.” Georgetown University Medical Center found that P-73 is just as effective as the most potent antibiotics in combating *Staphylococcus*. *The Journal of Molecular & Cellular Biochemistry* reports that Oreganol P-73 “may be highly effective in the prevention and treatment of candidiasis.” Oregacyn P-73 is the supplement to watch for in 2002 and beyond. This is the future of natural medicine.
