

Oregulin

**Potent Spice and Herb Extracts:
The Power of Natural Organ System Support**

Today, blood sugar disorders are a plague. The high sugar/starch diet of Americans causes this epidemic. Symptoms of blood sugar disorders are vague and often difficult to determine. Typical symptoms include depression, anxiety, nervousness, agitation, aggravation, irritability, fatigue, muscle pain, panic attacks, phobias, fears, crying spells, mood swings, insomnia, dizziness, leg cramps, tremors, headache and several more.

Oregulin was formulated by scientists for one major reason: natural support for the pancreas, liver, and digestive tract through the powers of edible spice and herb extracts. These are the most potent spice and herb extracts known, which help boost body function in numerous ways. Research proves the following:

- a) Oregulin was tested on diabetic mice: the mice improved in all parameters, including a reduction in blood sugar levels as well as blood pressure.
- b) Fenugreek, an active ingredient of Oregulin, has been proven to be a natural substance with blood sugar lowering powers, plus it naturally lowers cholesterol and triglyceride levels.
- c) Cumin, another active ingredient, was found to lower blood sugar levels superbly in experimental animals.
- d) Myrtle has been used for centuries as a means of blood sugar support: research is proving why.
- e) Oregano and cumin are natural anti-fungal agents, proven by modern research.

With Oregulin you get all of these extracts and more; all in a proprietary blend. It is the blend which makes it so useful. Support the function of your pancreas, liver, and intestines like no other with the original and only Oregulin, the wild herb and spice extract, mountain and wilderness grown. Oregulin is in a base of crude pumpkinseed oil, which aids in nourishing the body and supporting digestion.

How to Use Oregulin: this is a tasty spice extract, so it is easy to take and use. Simply take 1 gelcap after each meal. Take more if necessary. It is completely safe.

My name is Georgia Bell. In '93 they told me I had diabetes and since then I have been fighting with high and never low sugars. I never have take insulin or pills. I have always tried natural. I eat right and exercise regular. I am 64 years old this Aug. 2001. No complications. Then out of all of the natural medication I was taking I still had high sugars. Well I saw your ad in a paper at the health food store. I started not to try it but gave in.

I have been taking Oregulin for 2 months and I am so happy about it. My sugars are in 123 and 133 when it was 180, 160, 140, 200. Now a good level. Thanks for giving me confidence and a new life.

Your product really WORKS.

And tell the people, I am testifying about this on my own. NO PAY.

God Bless

Georgia Bell
