

Resvitanol

red sour grape

Everyone is talking about the powers of grapes. Yet, the true power is found in the whole grape—the skin, seed, vine and leaf. Resvitanol is the only grape product available that provides all components from the grape but without the sugar. Another of North American's famous "village formulas," it is made when the full red grape bunch is sun-ripened for a prolonged period of time. As a result, the sugar is extracted by the sun and the best remains: the minerals, flavonoids and vitamins.

Resvitanol is a true, unprocessed, grape product. Did you know that many of the commercial grape products are processed with solvents? With Resvitanol you get all of the benefits of the grape without chemicals.

Resvitanol is a dense source of flavonoids, vitamins, and trace minerals. Analysis shows that it is a top source of a wide range of minerals, particularly chromium, calcium, and potassium. It is also an excellent source of naturally occurring vitamin C, containing 150 mg per 100 grams (about 8 mg of crude, natural vitamin C per capsule). Thus, Resvitanol is a tremendously rich source of natural nutrients, and this is hard to find in herb/vitamin capsules.

There is yet another ingredient unique to Resvitanol: organic acids, such as tartaric and malic acid. According to Blumgarten, these substances are great stimulants for the digestion and elimination as well as for the kidneys. This may be why grapes have long been known as a detox aid as well as a kidney and digestive tonic.

Red sour grape is available in two forms:

1. **capsules**- 500 mg each, 90 capsules in the jar
2. **powder** - 120 mg jar with a measuring spoon

HOW TO USE RED SOUR GRAPE: it is delicious--munch on it! Take three scoops a day. Add capsule contents or powder to foods and shakes. Take two or three caps twice daily with juice or water, with meals or on empty stomach.

Always consult your physician first. Product not designed to cure any condition.
